

Orchid Systems creates add-ons that enhance the functionality of Sage 300...

Orchid Systems develops innovative add-on modules that enhance productivity, improve collaboration, support better decision making, and extend the functionality of Sage 300. We have been part of the Sage community for over 25 years.

All our Sage 300 add-ons are developed using the Sage 300 SDK, ensuring the familiar look and feel plus tight integration with other Sage 300 modules.

 5000+ Sage 300 Sites	 60+ Countries
 Sydney Australia	 10+ Industry Awards
 2 (average) Modules Per Site	 400+ Sage Business Partners
 13+ Integrated Modules	 25+ Years In Business

"Orchid are just a joy to work with. If everyone cared 10% as much as you do my world would be complete!"

FERNANDO GROSSI, ALLFOUR TECHNOLOGY ENTERPRISES,
ST ALBERT, AB, CANADA

"It's great to see Orchid products boosting Sage 300 and providing the opportunity to deliver brand new solutions with unbelievable ROI..."

MARK CARSON (CGA, CPA), BAASS BUSINESS SOLUTIONS,
THORNHILL, ON, CANADA

"Orchid Extender just might be the most powerful third party app ever. The sky's the limit"

IAN COOK, KERR CONSULTING, THE WOODLANDS, TEXAS, USA

"Every one of my clients uses an Orchid product, and usually more than one, on a daily basis. Their products just work, doing their job consistently and dependably"

KEVIN GARTLY, SOLIDBIZ SOLUTIONS,
EDMONTON, ALBERTA (AB), CANADA

Find out why over 5000 companies rely on Orchid's Sage 300 add-ons every day

Collaboration & Business Intelligence

Improve productivity and decision making with these Orchid modules, all designed to facilitate sharing and/or analysis of relevant, up-to-date information.

Info-Explorer

Affordable, intuitive business intelligence (BI). Use it just for its analysis power, or to prepare detailed budgets and forecasts, from within the same tool. Try our LITE edition free of charge, with pre-configured analysis cubes.

Notes

Context-sensitive notes throughout Sage 300. A platform for further customization when used with Extender.

Document Management Link

Context-sensitive links to relevant documents from any Sage 300 screen. Drag and drop to automatically store and rename. Role-based filters, and integration with file sharing systems (SharePoint, Dropbox etc.).

Email SmartLink

Click an icon to initiate an email from within Sage 300. Paste-in a hyperlink to the active Sage 300 record or screen, allowing the recipient to click directly through to it.

Automation & Productivity

Use these modules together, or in combination with other Orchid add-ons, to multiply their power.

Report Runner

Streamline production of recurring Crystal or Sage 300 GL Financial Reports. Create role-specific menus, run multiple reports and distribute by email, save parameters for re-running. Use Process Scheduler to automate execution and distribution.

Process Scheduler

Schedule integrity checks, reports, backups, day ends and other critical processes to run unattended. Results are logged and exceptions notified.

Streamlining Financial Processes

Increase productivity and accuracy when processing complex but routine transactions. Help your business respond to more complicated organizational structures and trading environments.

EFT Processing

Streamline payments and collection. Transfer Sage 300 receipts and payments, including payroll, through to the electronic funds transfer functionality of your banking software.

Inter-Entity Transactions

Keep inter-company loan accounts in balance across single or multiple Sage 300 databases. Increases the accuracy of your financial data, streamlines business processes and provides tight control over transactions spanning multiple entities.

Inter-Entity Trade

Automates Sage 300 transaction flows when related entities trade with each other. Initiate a transaction in one entity, and reciprocal documents are created in the other entity according to rules you set up. No more duplication.

Tailoring & Integration

These Orchid modules push out the boundaries of Sage 300, enabling innovative customization, and supporting integration with external software and data sources.

Extender

Tailor Sage 300 to meet your exact needs. Configure events to monitor and log changes to Sage 300 data, generate alerts, or trigger external applications. Extend Sage 300 business logic using Python scripts to automate business processes, enhance systems integration, develop custom screens, or provide tailored validation and alerting. Develop custom tables that form part of the Sage 300 database.

Optional Tables

Store custom data structures within your Sage 300 database. Manipulate in Excel and write back to Sage 300 using the included Spreadsheet Add-In. Combine with Info-Explorer for powerful budgeting and forecasting.

Data Views

The easy way to turn Sage 300 Optional Fields into database columns, simplifying and accelerating reporting.

AMT Integration

Provides integration between Sage 300 and the industry-leading AMT Asset Management Software.

Operations & Inventory Management

Improve productivity and customer service with these Orchid modules, which provide tight integration between Sage 300 and your operational processes.

Return Material Authorizations

Use flexible workflows to track and manage product returns and repairs from within Sage 300. Inventory and financial records are kept in synch, and customers can be kept fully informed.

Bin Tracking

Track items stored in multiple bins within a Sage 300 Inventory Control location for greater accuracy and efficiency. All bin information is held within your Sage 300 database. Can integrate with hand-held scanning devices.

Freight SmartLink

Streamlines Sage 300 integration with freight management systems. Auto-add freight charges to orders and store actual freight costs.
